

ZAMBESI RIVER CATCHMENT WATER MONITORING

Download Zambesi GIS water coverages for April 2019 and April 2020 at

<https://bit.ly/3e1fJJC>

In 2020, the Zambesi River is experiencing exceptionally high water levels that are significantly greater than recent years. **GEOTERRA**IMAGE is able to illustrate these conditions using its **monthly water monitoring capability**

This is the same capability that GTI uses to operationally monitor South Africa's national water resources every month. Mzansi Amansi (Water South Africa) www.water-southafrica.co.za

Total surface water coverage in the Barotse Floodplain, Caprivi Swamp and Kafue Flats
